

## DUGYTE GP521

Now for the first time ever connect and power your pedal board using just one cable!

Introducing the DuGyte GP521 Pedalboard Connection System by Maytech Music Systems.

Hand made and crafted out of rugged aluminum and the same size as most effects pedals, the DuGyte can easily sit next to other effects pedals or, space permitting, below your pedalboard surface. The GP521 offers multiple signal lines and up to 4.5 amps of clean regulated 9VDC power right at your pedal board to power upwards of 20 effects pedals.

With clean, noise-free signal quality and built-in regulated power, the DuGyte is the only choice for fast, simple and complete pedalboard signal and power set up using just one cable.

## THE DUGYTE CABLE

With the DuGyte GP521 All-One Cable, you get a single connector at your Pedalboard and five (5) individual connections to your back stage gear and the DuGyte Power Adaptor.

## DUGYTE CONNECTORS & PLUGS

**Pedalboard Connector** - Maytech MPJL-5 Bayonet Connection

### BACKSTAGE PLUGS

Mono 6.3mm Jack plug - Wireless loop back & Guitar Amplifier

Stereo 6.3mm Jack plug - Amplifier footswitch

5 pin MIDI plug

4 Pole DC Cobra Power Connector

## THE DUGYTE AC/DC POWER ADAPTOR

The DuGyte Power Adaptor, designed exclusively for use with your GP521 system, is the only DC power source you will ever need! This a serious piece of electrical equipment. Strong construction and road ready it includes:-

1. PFC (Power Factor Correction) ensuring correct voltage and current are maintained.
2. External Fuse - Protects your gear from any electrical shorts and spikes
3. Input - Universal Mains 240/120 @ 50/60Mhz - IEC plug input
4. Output - 24VDC @ 5Amp (max)
5. On/Off luminated power switch control
